Appendix B — What Got Posted to the Ledger

Welcome

This guide walks you through your first month of bookkeeping in LineLedger, from a brand-new account to a reconciled bank statement and a clean set of month-end reports.

We follow a small, real-world story: the **Edgemont Photo Club**, an unincorporated association in North Vancouver, British Columbia. Riley Park, the club's volunteer treasurer, sets the club up in LineLedger on January 1, 2026. During January the club:

1. Creates its organization with a standard non-profit chart of accounts
2. Sets up a **Founding Member** membership level at **\$10 per year**
3. Welcomes its first member, **Alex Tremblay**, and invoices their dues
4. Collects the \$10 in cash and deposits it at the bank
5. Reconciles the January bank statement, which includes a **\$2 bank service charge**
6. Reads the month-end reports: balance sheet, income statement, cash flow, and the membership roster

By January 31 the club's books show exactly what happened: **\$10 of membership revenue, \$2 of bank charges, and \$8 in the bank** — proven against the bank statement to the penny.

Nothing in this guide requires an accounting background. Where a bookkeeping idea matters (and only where it matters), a short *Why this matters* note explains it in plain language.

Note. LineLedger's interface says **organization** for what accountants might call the company, entity, or society. They are the same thing. This guide says organization throughout.

Tip. Every number, name, and date in this guide comes from a real LineLedger session — the screenshots are unretouched. Follow along with your own club's details and your screens will match.

Create Your Account and Organization

Everything starts at the registration page. If your club is self-hosting LineLedger, browse to your server's address; otherwise use your LineLedger provider's sign-in page.

Register

Click **Create account** on the login page (or browse to `/register`) and fill in your name, email address, and a password. Tick the terms checkbox and click **Create account**.

The image shows a web form for creating a LineLedger account. At the top is the LineLedger logo, which consists of a blue house-like icon followed by the text 'lineledger' in a sans-serif font. Below the logo is the heading 'Create an account' and a subtext 'Enter your details below to create your account'. The form contains four input fields: 'Name' with the value 'Riley Park', 'Email address' with the value 'treasurer@edgemontphoto.ca', 'Password' with masked characters and an eye icon, and 'Confirm password' also with masked characters and an eye icon. Below these fields is a checkbox that is checked, with the text 'I agree to the Terms of Service and Privacy Policy.' where 'Terms of Service' and 'Privacy Policy' are underlined. At the bottom of the form is a blue button labeled 'Create account'. Below the button, there is a link 'Already have an account? Log in' and a footer line '© 2026 Line Ledger · AGPL-3.0 · Source · Legal'.

Figure 1 — Registering the treasurer's account.

The setup wizard

A new account with no organizations lands directly in the eight-step setup wizard. The steps are listed down the left side; each one is a quick decision, and the wizard tells you when something can be changed later.

Setup your organization

A few quick questions tailor your chart of accounts, tax codes, and terminology. You can change everything later.

Figure 3 — Organization info. Note the confirmation under the last field: “Your fiscal year-end is December 31.”

Tip. The **fiscal year start month** controls how reports group your years. Most clubs run on the calendar year — start month January, year-end December 31 — which is what we chose. If your association’s bylaws set a different year-end, pick the month your fiscal year *begins*.

Step 2 — How is your organization organized?

Choose **Non-profit or charity**. A second question appears asking for your legal structure — choose **Unincorporated association**, which is what most small clubs are: a group of people with a constitution and an executive, but no incorporation papers.

Setup your organization

A few quick questions tailor your chart of accounts, tax codes, and terminology. You can change everything later.

How is your organization organized?

☐ Sole proprietorship ⓘ
An unincorporated business with one owner.

☐ Partnership ⓘ
An unincorporated business owned by two or more partners.

☐ Corporation ⓘ
A formal entity with one or more shareholders.

☒ Non-profit or charity ⓘ
A club, association, non-profit, or registered charity.

☐ Other / None ⓘ
Anything else, or not sure yet.

What is your legal structure?

☒ Unincorporated association
A club or group with no separate legal incorporation (e.g. a photography club).

☐ Non-profit corporation
An incorporated not-for-profit; files a corporate return even though tax-exempt.

☐ Registered charity
A CRA-registered charity that can issue official donation receipts and files the T3010.

Your books will be set up as an unincorporated association — membership-dues income, expenses, and net assets — using the deferral method for dues paid in advance. You can change this later in settings.

Back Continue

© 2026 Line Ledger · AGPL-3.0 · Source · Legal

Figure 4 — Non-profit or charity, then Unincorporated association.

Why this matters. This single choice tunes the vocabulary of your books. Equity becomes **Net Assets**, the bottom line of your income statement becomes **Excess (deficiency) of revenue over expenses**, and there are no owner draws or share capital anywhere — because a club has none. Registered charities get extra fields (a CRA registration number and a choice of contribution-accounting methods); an unincorporated association keeps it simple.

Step 3 — Industry and accounts

Keep **Standardized accounts** selected, and choose **Non-profit** as the industry. This is what builds your standard chart of accounts in the next steps — including accounts like *Membership Dues* and *Donations & Contributions* that a generic business chart wouldn't have.

Setup your organization

A few quick questions tailor your chart of accounts, tax codes, and terminology. You can change everything later.

Select your industry

Standardized accounts

Start minimal — I'll add my own

☐ General business

A balanced starter chart that fits most small businesses.

☐ Contractor / Construction

Job costing with materials, subcontractors, labour, and holdbacks.

☒ Non-profit

Donations, grants, program and fundraising tracking with net assets.

☐ Manufacturing

Raw materials, work in process, finished goods, and overhead.

☐ Retail

Merchandise sales, cost of goods, shrinkage, and card fees.

☐ Professional services

Service fees, retainers, and reimbursable project costs.

☐ Health & Wellness

Appointment fees, retail product, prepaid packages, gift cards, and tips.

☐ Restaurant / Food & Beverage

Food and beverage sales, tips, food cost, and kitchen supplies.

☐ Real estate / Property management

Commissions, rental income, security deposits, and trust funds held.

☐ Freelancer / Creative

Service income, client deposits, software, and equipment for solo creatives.

Figure 5 — Standardized accounts with the Non-profit industry template.

Step 4 — Features

LineLedger pre-selects a sensible feature set for a non-profit. Keep **Membership** switched on — it adds Members, membership levels, dues billing, and the membership roster report. We switched the other suggestions off; the photo club has no employees or fixed assets yet, and any feature can be turned on later in settings.

Setup your organization

What do you want to track?

Turn on the modules you need. You can change these anytime in company settings.

Inventory

Track stock on hand, costing, and cost of goods sold.

☐

Employees

Track employees and reimbursements.

☐

Payroll

Run Canadian payroll: pay employees, calculate CPP/EI/income tax, write cheques and prepare PD7A/T4/ROE.

☐

Fixed assets

Track capital assets and depreciation.

☐

Estimates

Send customer estimates and convert them to invoices.

☐

Sales orders

Track customer sales orders and fulfil them with invoices.

☐

Recurring invoices

Schedule recurring customer invoices.

☐

Recurring bills

Schedule recurring vendor bills.

☐

Classes

Tag transactions with a class to slice reports by segment, department, or program.

☐

Locations

Tag transactions with a location to slice reports by site, branch, or property.

☐

Budgets

Plan account-level budgets and compare them against actuals.

☐

Membership

Track members and membership levels, and bill recurring dues as invoices.

☒

Donations & grants

Record donation and grant income, track restricted funding, and issue donation receipts.

☐

Figure 6 — Membership is the one feature this club needs from day one.

Step 5 — Sales tax

The Edgemont Photo Club is **not registered for GST/HST** — like most small associations under the \$50,000 small-supplier threshold — so switch **I charge GST/HST** off.

Figure 10 — Ready to create: Canada · CAD, Club / Association, Unincorporated association, Non-profit chart.

Your new dashboard

A few seconds later you land on the dashboard: cash on hand, receivables, payables, and a six-month cash-flow chart — all zeros, which is exactly right for a brand-new set of books. The blue card at the top is a short stack of getting-started tips; each one links to the page it describes and can be marked done as you go.

LineLedger: Your First Month

Figure 11 — A fresh organization. The sidebar already shows Members under Revenues because the Membership feature is on.

Meet Your Chart of Accounts

Open **Accounting** → **Chart of Accounts** (or browse to *Accounts*). Everything the wizard promised is here, organized the way accountants expect — assets, liabilities, net assets, income, and expenses.

Why this matters. Every dollar in LineLedger lives in exactly one account, and every transaction moves dollars between two or more of them — that’s all double-entry bookkeeping is. You’ll see it in action in the chapters ahead; the chart is simply the list of places money can be.

The accounts this guide touches:

Code	Account	What it holds
1000	Chequing	The club’s bank account
1100	Accounts Receivable	Dues invoiced but not yet collected
1200	Undeposited Funds	Cash collected but not yet taken to the bank
4200	Membership Dues	Dues revenue
2510	Deferred Membership Dues	Dues collected for future periods (not needed this month)
3xxx	Net Assets section	The non-profit equivalent of equity

LineLedger: Your First Month

Figure 12 — The full chart. Note the equity section is titled with net-asset accounts: Opening Balance Net Assets, Unrestricted Net Assets, Restricted Net Assets.

Note. The club's chequing account starts at **\$0.00** because we left its opening balance blank — the club is starting fresh. If your club already has money in the bank, edit the Chequing account and enter the bank balance and the date it was true; LineLedger posts the opening entry for you.

Adding an account you need

The standard chart covers most of a club's life, but sooner or later you'll want an account it doesn't have. The club's credit union charges a monthly service fee, and good bookkeeping gives bank fees their own expense account rather than burying them in *Miscellaneous Expense*.

Click **New account** and fill in:

Field	Value
Code	6010
Name	Bank Charges
Type	Expense: Expense

New account

Code: 6010 Name: Bank Charges

Type: Expense: Expense

Parent account (optional): — None —

Description:

Cash flow activity: Auto (classify by type)

Default tax code: — None —

Active: ☒

Buttons: Cancel, Save

Figure 13 — Adding 6010 Bank Charges. Codes in the 6000s keep it sorted with the other expenses.

Click **Save**. The account appears in the expense section, ready for the bank reconciliation at month-end.

Set Up a Membership Level

A membership level describes a kind of membership your club offers: what it's called, what it costs, how often it renews, and — importantly for the books — which revenue account its dues land in.

Open **Settings** → **Lists** → **Membership levels**.

Figure 14 — Membership levels live under Settings → Lists.

Click **New level** and create the club's first membership type:

Field	Value
Name	Founding Member
Default dues	10.00
Billing frequency	Annual
Revenue account	4200 — Membership Dues
Default terms	Due on receipt

The screenshot shows the LineLedger 'Settings' interface. On the left is a sidebar with navigation links: Dashboard, Banking (Bank register, Cheques, Deposits, Transfers), Revenues (Members, Invoices, Receipts), Purchases (Vendors, Bills, Bill payments, Expenses), Accounting, Reports, and Documents. At the bottom of the sidebar is a user profile for 'Riley Park'. The main area is titled 'Settings' with the subtitle 'Manage your profile and account settings'. A list of settings categories is on the left: Profile, Security, Organizations, Combined reports, Appearance, Sidebar, Legal, Company, Invoices, Tax & filing, Currencies, Referrals, Backup & Export, Lists, All lists, Items, Item categories, Tax codes, Payment terms, Payment methods, Membership levels, and Form styles. The 'Membership levels' section is active, showing a '+ New level.' button. A modal titled 'New level' is open, containing the following fields: 'Name' (Founding Member), 'Default dues' (10.00), 'Billing frequency' (Annual), 'Revenue account' (4200 - Membership Dues), 'Default terms' (Due on receipt), and 'Default tax code' (None). An 'Active' toggle switch is turned on. 'Cancel' and 'Save' buttons are at the bottom right of the modal.

Figure 15 — Founding Member: \$10 per year, posting to 4200 Membership Dues, due on receipt.

Tip. The **revenue account** on the level is the magic. Every dues invoice generated from this level posts its revenue there automatically — you'll never pick an account by hand when billing members.

Click **Save**. The level is ready to assign.

Membership dues — Founding Member (MEM-000001)

Attachments

No attachments yet.

Drag & drop files here, or click to browse

PDF, images, or Office docs up to 10 MB each.

Figure 20 — INV-000001, posted. Balance due \$10.00. The “GL entry JE-000001” chip links to the exact ledger entry this invoice created.

Why this matters. Posting the invoice records revenue the club has *earned*, even though no cash has arrived yet — that’s accrual accounting, and it’s why your reports can distinguish “members owe us money” from “money in the bank.” In ledger terms, posting INV-000001 moved \$10 into Accounts Receivable and \$10 into Membership Dues revenue:

Account	Debit	Credit
1100 — Accounts Receivable	\$10.00	
4200 — Membership Dues		\$10.00

Record the Payment

At the January 12 club meeting, Alex hands Riley a ten-dollar bill. Time to record it.

Open invoice INV-000001 and click **Receive payment**. The receipt form opens with the customer, amount, and invoice application already filled in. Set:

Field	Value
Date	2026-01-12
Amount	10.00 <i>(pre-filled)</i>
Deposit to	1200 — Undeposited Funds <i>(the default)</i>
Payment method	Cash

Total applied			10.00

Save & post

Figure 21 — Receipt REC-000001: \$10 cash, applied to INV-000001, held in Undeposited Funds.

Why this matters. Undeposited Funds is the envelope in the treasurer’s desk drawer: money the club has received but hasn’t taken to the bank yet. Recording cash there (instead of straight into Chequing) means your books can match the bank statement *exactly* — the bank sees one deposit on the day you visit the credit union, not a trickle of individual receipts.

Click **Save & post**. The invoice flips to **Paid**:

Figure 22 — Paid in full. Balance due \$0.00.

The ledger entry behind REC-000001 — the \$10 moves from “owed to us” to “in the drawer”:

Account	Debit	Credit
1200 — Undeposited Funds	\$10.00	
1100 — Accounts Receivable		\$10.00

Make the Deposit

On January 15, Riley takes the cash to the credit union. Record it under **Banking** → **Deposits** → **New deposit**:

Field	Value
Deposit to	1000 — Chequing
Date	2026-01-15
Undeposited receipts	✓ REC-000001 — Alex Tremblay — \$10.00

Every receipt sitting in Undeposited Funds is listed with a checkbox, already ticked. With more members you'd collect several receipts into one deposit — one line on the bank statement, one deposit in the books.

Make deposit

Deposit to: 1000 — Chequing Deposit #: DEP-000001 Date: 2026-01-15

Memo:

Undeposited receipts

	Date	Receipt #	From	Ref	Amount
☒	2026-01-12	REC-000001	Alex Tremblay		10.00

Other deposits
Add owner contributions or refunds; enter a negative amount to net out a bank/merchant fee. + Add line

Deposit total **10.00**

Save draft Save & post

Figure 23 — DEP-000001: one \$10 receipt deposited to Chequing on January 15.

Click **Save & post**, then have a look at **Banking** → **Bank register**. The deposit is there and the ledger balance reads **\$10.00** — cleared balance still \$0.00, because nothing has been reconciled against a bank statement yet. That's the next chapter.

Figure 24 — The Chequing register: ledger balance \$10.00, cleared balance \$0.00.

The deposit’s ledger entry — out of the drawer, into the bank:

Account	Debit	Credit
1000 — Chequing	\$10.00	
1200 — Undeposited Funds		\$10.00

Reconcile January

In early February the credit union's January statement arrives:

Edgemont Community Credit Union — Statement, January 2026

Opening balance, Jan 1	\$0.00
Jan 15 — Deposit	+\$10.00
Jan 31 — Service charge	-\$2.00
Closing balance, Jan 31	\$8.00

Reconciling means proving your books against this statement, item by item, until the difference is zero. It's the treasurer's monthly act of accountability — and in LineLedger it takes about a minute.

Why this matters. A reconciled month is the difference between “I think the books are right” and “the bank agrees the books are right.” It catches missed transactions, double entries, and typos while they're days old instead of at year-end. Make it a monthly habit; your auditor (and your successor) will thank you.

Begin the reconciliation

Open **Banking** → **Bank register**, then choose **Actions** → **Reconcile**, and click **Reconcile**. The *Begin reconciliation* dialog asks for the statement's bottom line — and right here is where you record the service charge, without leaving the flow:

Field	Value
Statement date	2026-01-31
Beginning balance	0.00 <i>(calculated for you)</i>
Ending balance	8.00
Service charge — Amount	2.00
Service charge — Date	2026-01-31
Service charge — Account	6010 — Bank Charges

The screenshot shows the LineLedger interface with a sidebar on the left containing navigation links like Dashboard, Banking, Revenues, and Purchases. The main area is titled 'Reconcile' and shows a modal form for 'Begin reconciliation'. The form includes fields for Statement date (2026-01-31), Beginning balance (0.00), and Ending balance (8.00). It also has sections for 'Service charge' and 'Interest earned', each with Amount, Date, and Account dropdowns. The Service charge section shows an amount of 2.00, date of 2026-01-31, and account of 6010 - Bank Ch. The Interest earned section shows an amount of 0.00, date of 2026-06-30, and account of 4900 - Investrr. A 'Continue' button is at the bottom right of the modal.

Figure 25 — Statement date, ending balance, and the \$2 service charge to the Bank Charges account from chapter 3.

Click **Continue**. LineLedger posts the service charge for you and marks it cleared — it's on the statement, after all.

Clear the transactions

The reconciliation screen shows two panes: money out (*Cheques and Payments*) and money in (*Deposits and Other Credits*), with a running summary pinned to the bottom. The service charge is already marked. The deposit isn't yet — and the summary shows the difference you still have to explain.

Figure 27 — Cleared balance \$8.00, ending balance \$8.00, difference \$0.00. The books match the bank.

Click **Reconcile now**.

The proof

LineLedger files the reconciliation and shows the permanent record: balances, the service charge, who completed it and when, and every item cleared. You can attach the bank statement PDF right on this page — future-you will be glad it's there.

Figure 28 — Reconciliation #1, completed. Difference \$0.00, one deposit and one payment cleared, statement attachable below.

The service charge's ledger entry, which LineLedger posted from the dialog:

Account	Debit	Credit
6010 — Bank Charges	\$2.00	
1000 — Chequing		\$2.00

Read Your Month-End Reports

With January reconciled, the reports almost write the treasurer's report for you. Open **Reports** in the sidebar to see everything available; the four below are the monthly staples for a membership club.

Figure 29 — The reports hub. Financial statements at the top; the membership roster lives with the member reports.

Balance sheet — what the club has

Set *As of* to **2026-01-31**. Total assets \$8.00 (all of it in Chequing), no liabilities, and net assets of \$8.00. Because the club is a non-profit, the equity section speaks the right language: **Net Assets**, with the year's surplus shown as *Excess (deficiency) of revenue over expenses*.

Figure 30 — Assets = Liabilities + Net Assets: \$8.00 = \$0.00 + \$8.00.

Income statement — what happened this month

Set the period to **January 1 – January 31, 2026**. Revenue \$10.00 (Membership Dues), expenses \$2.00 (Bank Charges), and the non-profit bottom line: **Excess of revenue over expenses, \$8.00**.

Figure 31 — January in one page: \$10 in, \$2 out, \$8 kept.

Cash flow statement — where the money moved

Same period. Operating activities brought in \$8.00 net, and ending cash is \$8.00 — for a simple month it confirms the same story, and as the club grows it will explain months where surplus and cash *don't* move together (dues invoiced but not yet collected, for instance).

Figure 32 — Net change in cash: +\$8.00, ending cash \$8.00.

Membership roster — who the club is

Under member reports, the roster lists every member with level, status, dates, and any open dues — Alex Tremblay, Founding Member, **Active**, nothing owing. The **Download** button exports it as PDF or XLSX for the AGM binder or the membership secretary.

Membership Roster
Edgemont Photo Club

Active only [Download](#)

Member #	Name	Level	Status	Joined	Expires	Open dues
MEM-000001	Alex Tremblay	Founding Member	Active	Jan 5, 2026	Jan 4, 2027	CA\$0.00

Figure 33 — One member strong, dues paid in full.

Note. Reports → Non-profit also offers statements titled the way many boards and funders expect them: the **Statement of Financial Position** (figure 34), **Statement of Operations**, and **Statement of Changes in Net Assets**. Same numbers, formal presentation.

Figure 34 — The Statement of Financial Position as of January 31, 2026 — the balance sheet in its Sunday best.

Where to Go Next

January is closed: invoiced, collected, deposited, reconciled, and reported. A few directions worth exploring as the club grows:

- **Auto-renew dues.** Switch on *Auto-renew* on a member's page and LineLedger generates their renewal invoice each billing period — no February to-do list.
- **More members.** *Members* → *New member* is the whole flow; the roster, dues billing, and reports scale with you. Existing contacts can be made members too.
- **Invite the executive.** *Settings* → *Organizations* lets you invite the president or a co-signer with a role that matches what they should see — viewer access for the board, full books for a co-treasurer.
- **Import the bank statement.** The bank register's *Actions* menu imports CSV/OFX statement files and learns matching rules, so reconciliation gets even faster.
- **Donations & grants.** When the club starts fundraising, enable the *Donations & grants* feature in settings — the chart already has the accounts waiting.
- **In-app documentation.** The *Docs* section inside LineLedger covers every module in this guide and the ones you haven't met yet.

Appendix A — January at a Glance

Measure	Amount
Membership revenue (4200)	\$10.00
Bank charges (6010)	\$2.00
Excess of revenue over expenses	\$8.00
Cash in bank, January 31	\$8.00
Accounts receivable, January 31	\$0.00
Net assets, January 31	\$8.00
Bank statement closing balance	\$8.00
Reconciliation difference	\$0.00

The treasurer's report, in one sentence: *the club earned \$10 in founding-member dues, paid \$2 in bank charges, and holds \$8 at the credit union — reconciled to the bank statement with zero difference.*

Appendix B — What Got Posted to the Ledger

Four documents touched the books in January. Here is each one's journal entry — the double-entry view of everything this guide did. Debits always equal credits, in every entry and in total.

January 5 — Dues invoice INV-000001 posted

Account	Debit	Credit
1100 — Accounts Receivable	\$10.00	
4200 — Membership Dues		\$10.00

The club earned dues revenue; Alex owes \$10.

January 12 — Receipt REC-000001 (cash) posted

Account	Debit	Credit
1200 — Undeposited Funds	\$10.00	
1100 — Accounts Receivable		\$10.00

Alex paid; the \$10 sits in the drawer awaiting a bank run.

January 15 — Deposit DEP-000001 posted

Account	Debit	Credit
1000 — Chequing	\$10.00	
1200 — Undeposited Funds		\$10.00

The \$10 reached the bank.

January 31 — Bank service charge (posted from the reconciliation dialog)

Account	Debit	Credit
6010 — Bank Charges	\$2.00	
1000 — Chequing		\$2.00

The credit union's monthly fee.

Closing trial balance, January 31, 2026

Account	Debit	Credit
1000 — Chequing	\$8.00	
1100 — Accounts Receivable	—	—
1200 — Undeposited Funds	—	—
4200 — Membership Dues		\$10.00
6010 — Bank Charges	\$2.00	
Total	\$10.00	\$10.00

Every entry above is also visible inside LineLedger — each posted document links to its GL entry (you saw *JE-000001* on the invoice page), and every posting is recorded in a tamper-evident audit log. The books don't just balance; they can prove it.

This guide was produced against LineLedger in June 2026 using a live organization; all figures are real output. To regenerate it, see [docs/manuals/README.md](#) in the LineLedger repository.
